

S-Cargo Straps

Riders who trailer are familiar with the hassles involved with tie-downs. It can be frustrating getting the buckle to function properly and to untangle the loose straps. Once the straps are secure a lot of people create all kinds of art with the loose ends. Life does not have to be so complicated. S-Cargo Straps use a unique neoprene pouch, which makes them different from anything else. The lower hook and all the webbing fit inside when not in use. It seems quite simple, but it works. The pouch also protects your motorcycle from any potential damage from the buckle. If you don't want to buy a whole new set of straps, just buy an empty pouch and put your existing straps inside. For more details, visit www.s-cargostrap.com.

K&N Filters

K&N has long been a leader in filter technologies, and most people think about racing when they hear the name. All of us can feel a little better when we take care of the motorcycles that bring us so much joy. K&N offers oil filters, air filters, cleaning accessories, and other related products. These top-of-the-line filters help motorcycles perform at their best. The oil filters are made with a high-efficiency media specifically designed to withstand the high concentrates of synthetic racing oils. The air filters use multiple layers of cotton gauze placed between powder-coated aluminum wire screen. What does all this mean? It means your motorcycle will run cleaner, more efficiently, and produce more power. See more at www.knfilters.com.

Skyroll Travel Bag

The Skyroll MC is a modified version of the award-winning Skyroll garment bag made specially for motorcycles. Suits, jackets and large clothing go into a detachable garment carrier that gently wraps around an inner core, which holds your smaller items. There is no folding, no creases, fewer wrinkles, and no more cramming your nice clothes into traditional touring bags. You can commute to work or an event with nice clothes and arrive looking sharp. The Skyroll comes with a custom-fitted toiletry kit and a rain cover with a reflective logo. Check it out at www.skyroll.com.

Rescue Tape

You'll find Rescue Tape at numerous trade shows and for good reason. It's one of those products you'll never think about until you need it. That's why it's a good idea for touring and adventure motorcyclists to keep a roll or two handy. The tape is self-fusing, waterproof and airtight, and it creates a permanent seal. It withstands 700psi, resists 500 degrees Fahrenheit, and insulates 8000 volts. To top it off it resists fuels, acids, oils, solvents, salt, and UV rays. Rescue Tape comes in different colors and varying widths to suit your needs. Available at www.rescuetape.com.

Big Bike Parts

Big Bike Parts has introduced a new version of its top-selling Gold Wing® LED driving/fog light for cruisers. This new high-intensity LED driving light provides a true bright white light and delivers a great horizontal beam to help see the road and swale areas at night. LED lighting is unparalleled in brightness and intensity, bringing excellent visibility to motorcycling. These DOT approved lights are now available with either Big Bike Parts Contour or Elliptical Light Bars with fitments for Honda, Suzuki, Kawasaki and Yamaha cruisers. Visit www.bigbikeparts.com to find out more.
